

QUALITY POLICY

ASL Ltd Wire & Cable Division is committed to manufacturing and delivering quality electrical wires, cables, and conductors that meet our customers' requirements and exceed their expectations.

We shall achieve the above through: -

- Providing cost-effective and efficient products that meet and exceed our customers' expectations.
- Understanding internal and external issues relevant to our company and strategic direction, which can affect the Quality Management Systems' ability to achieve our intended results.
- Determining the organizational risks, opportunities, and mitigation measures to prevent potential process risks and safeguard the Quality Management Systems capabilities.
- Establishing relevant and measurable quality objectives at various levels within the organization, which are used to achieve our quality intentions and also drive improvements in our quality management systems.
- Promoting a culture that motivates, energizes, and recognizes the contributions of the staff, individually and in teams.
- Ensuring all employees are aware of the importance of their activities and how they relate to the overall achievement of the company's objectives.
- Ensuring that we comply with the applicable regulatory, statutory, and quality management systems (QMS) requirements of the ISO 9001:2015 standard and continually improve the system's effectiveness.
- Building and developing skills in our employees in order to maintain and/or exceed our customer expectations through understanding their needs, improving on the quality, and delivering value

This statement has been communicated to all staff within the organization and will be reviewed together with the quality objectives at least once a year to ensure continuing suitability and effectiveness of the quality management systems. The policy statement is also available to interested parties on the company website and other social media handles.
